. As you can see, the developers recently added support for the .net platform 4.0 and 4.0SP2, so in order to use these programs without fear, you will have to install them on your system. If you are using Windows XP and have .net 3.5 SP1 or 3.0, then

your best bet is to install the latest version. If you have Windows 2000, then it is best to use .net version 3 SP 1 or 3.5. As for updating these programs for .net 4.0 SP2 or 4.0, there is no problem.
