Bandai CD Cataloguer Network is a lightweight Windows utility built specifically for helping you organize your audio collection into catalogues, including audio CDs, DVDs, or other discs. It sports a clean and straightforward interface that gives users the possibility to add a new CD to the catalogue by selecting the disc and giving details about it (name and group), as well as adding a short description. Plus, you can view information about it (volume label, used space), upload a cover image from your computer (e.g. JPEG, BMP, DIB, GIF, PNG, PCX, TIF, ICO, EMF, TGA), insert a barcode and price details, pick the disk type (e.g. CD, DVD, DVD-RW, CD-RW), as well as look up audio CD information over the Internet using the CDDB method. Furthermore, Bandai CD Cataloguer Network enables users to save the selected files to the computer, copy the name of the songs to the Clipboard, view file details (type, size, patch, date when it was last modified), as well as perform searches throughout the entire database and apply filters for accurate results. Other important features worth mentioning allow you to create reports, preview files and the content of the disc, add loan information for each disc, view a list with borrowers, export the information (e.g. disk code, name, volume label, serial number, used size, free space, price) to HTML file format, create macros, and save data to archived files. All things considered, CD Bank Cataloguer Network offers a simple software solution when it comes to copying data from different discs, saving it to your computer, and organizing into catalogues.
