Bt12 Downloads Cracked/Keygen Â· CRACK Bigasoft ProRes Converter v4 4 5 5415 Incl Keymaker-BLiZZARD.Q: Uncaught SyntaxError: Unexpected identifier at jQuery code I've been trying to figure this out and thought I had a good handle on the problem but I am not getting to the root of it. I am using firefox as my browser and when I use the up-arrow to see the code, it throws up the error of Uncaught SyntaxError: Unexpected identifier at line 22 of I'll explain my jQuery code:

```
$('.trigger').on('click', function (e) { $('.menu-button').removeClass('open'); e.stopPropagation(); });  
$(document).on('click', '.nav-btn', function (e) { if ($(".menu-button").hasClass("open")) { $('.menu-button').removeClass('open'); } else { $('.menu-button').addClass('open'); } });  
$('.menu-button').on('click', function () { if (!$('.menu-button').hasClass('open')) { $('.menu-button').addClass('open'); } });
```

I'm not sure what I'm doing wrong, it's probably something pretty minor that I'm missing. I've written this code for my website and I'm just trying to figure out why I'm getting the syntax error. Thanks for the help!

A: Those functions are self executing. You have to remove the parentheses: `$(document).on('click', '.nav-btn', function(e) { if $(".menu-button").hasClass("open")) { $('.menu-button').removeClass('open'); } else { $('.menu-button').addClass('open'); } });`
