Game Features: 1. A random battle system. - All you have to do is wait for the line of battle screen to pop up, then press 'B' for the number of turns in advance you want to battle. - The battler's stats will

appear after a while. - All battlers have different personalities, even if they are of the same class. - NPCs can be encountered as well! - Battlers are hard to win when they are in the spotlight of battle for a long time. - NPCs are easy to handle. - NPCs are automatically destroyed when they are in the spotlight of battle. Battle against 4 other players online! - PvP battles in MMORPGs are often quite cruel. - In single player games, however, it's nice to be able to enjoy PvP battles without getting hurt. - So this is the idea behind this game. - In any battle against more than 4 opponents, there will be 13 battlers in total. 4. Completely customizable background. - Depending on the game settings, there may be a lot of battlers in the background of a map. - In a single screen, the background of the map can be customized to add a stronger atmosphere to the game. - A background with a lot of stars, clouds or a rainbow, can create an atmosphere of adventure or mystery, depending on the game. 5.
