PREEETI ARORA Author-Sumita Arora Chapter 12: Programming Methodology 13:00 am to 1:00 pm Abstract This chapter covers a variety of programming languages, programming modes, and computer programming concepts and methodologies. This chapter is divided into four parts. The first two parts introduce and discuss the concepts of programming languages, programming paradigms, computer languages and language characteristics, higher order programming, and programming methodologies. The third part deals with the particular topics of object-oriented programming, a programming paradigm popularly known as object-oriented programming. The topic of C++, an object-oriented programming language, is also covered here. The fourth part is on data structures. The first part introduces the fundamental concepts of programming, programming languages, and programming paradigms. This part focuses more on the language and language characteristics of these languages rather than their features. The second part of the first part discusses the methodologies of programming languages. The third part highlights some of the important features of objects-oriented programming and C++. The fourth part discusses data structures.
