I read a great review in Booklist and was looking for it. I downloaded it, but it was too big and after read it about half of it I found that there was nothing in it that wasn't in my online current Spanish course and the other half of it was basic information and something I could probably find in a Spanish magazine. Now that I've found it I think I'll pass. :) It's FREE for all the raw text and a little more advanced stuff in French but I didn't see enough in French to be worth the download because I don't think I'm going to need French. :) Rating: 5 out of 5 posted on 11/17/2003 2:56:38 AM PST by Arpen I have found that the methods that I have used up to now are not working with my kids. They are at a point where they are ready to use the Level 1 for Intermediate Spanish. I looked through the text for other methods, and found that it was basically the same information on the rest of the Levels as far as I can see. Well I figured I might try it with my kids before I ordered it, and I'm glad I did! In my estimation, it's just not the way to go. Too little to the point of being meaningless, and way too much that doesn't make sense at all. I tried reading through the first parts of the book, and when I got to the part where they start teaching vocabulary I got so frustrated that I threw it all away. It would have been better if they provided a little more of a real-time translation for it all, since they don't bother to show that in the video in the first few lessons. I must say, I'm impressed by the quality of the printing and the text-to-speech feature. So far, the audio books seem just as good. Everything I've read for Spanish is on the computer, and I think it's very cool that I can buy books from this site and listen to them while I'm going around shopping, cleaning, or anything else. All the others have been pretty short on the books, so it's nice to get a whole book
