When viewing the site the way you are supposed to all i get is a blank white screen. This is how i set up my project, now this is with google app engine, i still have same problem if i use the standard apache server, on a couple domains if i use the the normal apache server and it is pointing to the right dns servers, it works fine but not on the apache gae server. THE apache server is configured to send the mime type and host with a static map, the dns are configured with the domains name, so i would expect

the site to load. Any ideas. Cheers. /djangoproject/project/views.py def urlconf(url): from django.conf.urls.defaults import \* from django.conf import settings return patterns('', (r'^admin/', include(admin.site.urls)), (r'', include('base.urls')), ) /django-project/django/urls.py from django.conf.urls import patterns, include, url urlpatterns =
